

## HONOR MANCHESTER MARTYRS

### McADOO AND JOHN WHALEN SPEAK AT CORK MEN'S MEETING

The Secretary of State Talks to a Gathering of Irishmen at the Lyric Theatre and Tells Them to Stand Firm for Home Rule—Father Chidwick Also Speaks.

Memorial services were held in the Lyric Theatre last night under the direction of the Cork Men's Association to commemorate the "Manchester Martyrs." Allen, Larkin and O'Brien. There were delegations present from most of the Irish societies. Edward O'Mahony, the Irish banno, sang "Who Feels to Speak of 1882?" and a program of Irish songs followed. The principal speakers of the evening were ex-Police Commissioner McAdoo, Father John T. Chidwick and Secretary of State John Whalen.

Mr. McAdoo said that the services were a fitting testimonial to the imperishable Irish national feeling and to the martyrs of a people who had done so much to add to the glory and greatness of the United States. "Ireland has never ceased to fight for its independence," he said. "We have been fighting for 700 years and will continue to fight until Ireland has national unity and her rights." He closed by comparing Allen, Larkin and O'Brien to Nathan Hale.

Secretary Whalen said: When I shall have laid down the duties of my office, numbered among the most pleasant events of my official career will be the anniversary of Irish songs followed. I have been asked to appear here to-night to pay my feeble tribute to the great trinity of Irish martyrs that sacrificed their lives on the altar of their country forty years ago to-day. I am deeply grateful to the Cork Men's Association of New York for honoring me with an invitation to address this assemblage. I believe in such gatherings as this. The lives of our Irish heroes should be recalled often, for the recital of their noble deeds makes good men, good citizens and good Irishmen.

A nation is known by the men it produces. Taking this as a standard, Ireland is one of the greatest nations ever founded. It has transmitted to posterity the names and fame of men who have adorned history's pages—men who have won distinction upon the battlefield, in the pursuit of peace, in art, literature, science, statesmanship and in all of the professions.

Some men live so that their tombstones contain their only epitaph. Not so with our Irish heroes. The lives of Allen, Larkin and O'Brien, Charles Davin, Duffy, Robert Emmet, Hugh O'Donnell, Curran, Grattan, Burke, Sheridan, O'Connell, John Boyle O'Reilly and scores of others form a chain of golden deeds that will forever be held to mankind to make the eye gleam and the heart throb. These men are noble examples of men who strive up to noble actions. The history of their deeds inspire us with noble thoughts. Let it be said of every Irishman that he has never buried his friends with his friends. The loss of their company is sweetened by the contemplation of their manifold virtues.

Adversity brings out the real worth in nations as it does in individuals. Money, power, wars, famines, earthquakes, persecution and other forms of calamities try the souls of nations and also the souls of men. Ireland has been tested in the fiery furnace of adversity and found not wanting. Tyrannical hands have been laid upon it heavily; famines have laid waste her lands; prisons have been crowded by her heroes; her priests and ministers have felt the leaden heel of oppression; her national airs have been stifled in the halls that once were trod by her kings; poverty has stalked through her thirty-two counties; but she has never been bowed at every crossroad to hang men who dared to speak in the name of "Liberty."

her Thomas Jefferson and Patrick Henry have gone down to the stillness of the vast world in soft sorrow, but feeling that death's deliverance from persecution and oppression was welcome. But Ireland in spite of bitter storms and tempests still survives, a monument to a people who have not yielded to their sorrow, but who have overcome them.

A long course of adversity has hardened the Irish people. Their trials, struggles and battles against the forces of tyranny and war have been borne bravely and bravely. They have received satisfaction by memory in the thought of the deeds of their heroes, and in expectation in knowing that the good deeds of the past will be a link in the chain of the new born Irish republic.

"I liken an Irishman to a cork. He may be held down, but when he is released he will bob up to the sea toppling tyrants. Although stripped of many of their rights, the Irish people will continue to fight for freedom. To attain that glorious end there must be effective and popular organization. Everything is in organization. The loyal and true leaders much can be accomplished. Such bodies as the Cork Men's Association can aid wonderfully in spreading the doctrine of home rule for Ireland.

Keep everlastingly alert. Let not your steps falter. Teach your children to follow in your footsteps in the work of your organizations. Through education great things can be accomplished. Do not let your grip be loosened on the truth and the right. Let us hope that it will come in our generation— Ireland's ship of state will proudly sail up her beautiful rivers. Then there will be peace in all that broad land. The Irish people will join in a Te Deum to the mighty God and Tara's hall will resound to the ringing music of the national hymn of the new republic.

Among those present were Fire Commissioner Lantry, Mayor Thomas F. Lynch, O'Donovan Rossa, Patrick Egan, John F. Brennan and Michael Breslin. The political exiles of the troubled days were represented by John Curtin Kent, Daniel Hurley and Patrick Murphy.

## 300 SCHOOL TEACHERS WANTED

In the Philippines at the Beginning of the Next School Year.

WASHINGTON, Nov. 24.—The Bureau of Insular Affairs of the War Department has received a cable dispatch from Governor General Smith of the Philippines indicating the probability that 300 additional school-teachers will be required in the islands at the beginning of the next school year, early in June. These teachers will be selected from among those passing either the teachers' or the assistants' examinations, which are held semi-annually by the Civil Service Commission. The examination for assistant is of a higher grade than that for teacher and is more particularly intended for those with college or university training.

So social examinations will be held during the Christmas holidays and the insular bureau as well as the insular authority is desirous of having a large number of teachers qualify at that time. The examinations will be open to the wives, fiancées or other women who are near relatives of those already in the service. The time limit is between 20 and 40 years. The major portion of the appointments will be made at the entrance salary of \$1,200 a year. Those appointed as the result of the examination for assistant will be eligible without further examination to promotion to higher positions, including those of division superintendent.

In his address at the opening of the Philippine Assembly Secretary Taft referred to the progress which had been made in the islands as a result of the work of the American teachers and of the difficulties which at first had to be overcome by reason of the many dialects spoken in the islands. He made the assertion that more native Filipino now speak English than Spanish, although Spanish was for more than two hundred and fifty years the language of the ruling race.

## TRADE WITH AMERICAN STATES.

A Large Share of Their Commerce is With This Country.

WASHINGTON, Nov. 24.—"Commercial America in 1909" is the title of a monograph just prepared by the Bureau of Statistics of the Department of Commerce and Labor. It states the total foreign commerce of all American countries in the latest year for which statistics of the various countries are available at five and a half billions of dollars, speaking in round terms, out of a world's total of over twenty-seven billions of international trade.

Of this total of five and a half billions of commerce of all America, three billions, still speaking in round terms, is that of the United States and two and a half billions of the other countries of America, including in this the West India Islands. Considering the total exports and imports separately, the total imports of all America are set down at two and a quarter billion dollars and the total exports three and a quarter billions. Of the imports, amounting to two and a quarter billions, about one-half are those of the United States, and of the exports, amounting to three and a quarter billions, over one and three-quarter billions are those of the United States, and a little less than one and a half billions those of the other countries.

Considering that part of America other than the United States, the imports in the latest year for which statistics are available aggregated 1,118 million dollars, of which 407 millions or 36½ per cent., was drawn from the United States; the total exports of all the American countries other than the United States were 1,402 million dollars, of which 445 millions, or 32 per cent., was sent to the United States.

The total imports of all North American countries other than the United States were, in the latest available year, \$394,000,000, of which \$233,000,000, or 59 per cent., was sent to the United States, while the total exports of the South American countries were \$224,000,000, of which \$73,000,000, or 32½ per cent., was from the United States. The total exports of all North American countries other than the United States were, in the latest available year, \$394,000,000, of which \$233,000,000, or 59 per cent., was sent to the United States.

The Central American States and the States of South America, fronting on the Caribbean Sea, all took a large share of their imports from and send a large share of their exports to this country. Mexico took in 1908 45.9 per cent. of her imports from and sent 38.1 per cent. of her exports to this country. The Bahamas, lying but a short distance off our coast, took in 1905, the latest year for which figures are available, 71.2 per cent. of their imports from and sent 71.3 per cent. of their exports to the United States. Cuba took in 1908 48.6 per cent. of its imports from the United States and sent this country 44.3 per cent. of its exports.

The Central American States and the States of South America, fronting on the Caribbean Sea, all took a large share of their imports from and send a large share of their exports to this country.

## THE PLAGUE IN SAN FRANCISCO.

Ninety-six Cases Up to Nov. 10, of Which Sixty Proved Fatal.

WASHINGTON, Nov. 24.—Past Assistant Surgeon Blue of the Marine Hospital Service, who is in charge of the plague situation in San Francisco, has reported to Surgeon-General Wyman that the disease seems to be on the decrease, and it is believed that the cases now being reported represent all that are occurring in this city. During the first week of this month 13,000 rats were trapped and found dead by the men scattered about in an effort to kill all rodents which are infected with and transmit plague germs.

Up to November 10, according to the reports received at the offices of the Marine Hospital Service in this city, there had been ninety-six cases of plague reported in San Francisco, from which sixty deaths have resulted. The poisons used for rats have included plaster of paris, phosphate, phosphorus and arsenic paste. The latest report has been that the plague has been eradicated in the city. The situation in the Punjab of India is probably the most serious with which the sanitary authorities have ever had to deal. The plague has been reported in the Punjab of India, but in no other part of the world. The situation in the Punjab of India is probably the most serious with which the sanitary authorities have ever had to deal.

## VALUE OF OUR MANUFACTURES.

It Aggregates Nearly \$15,000,000,000 a Year—\$11,000,000,000 Exported Last Year.

WASHINGTON, Nov. 24.—The report of John H. Carmo, chief of the bureau of manufactures for the year ended June 30, 1907, says that the value of the output of the manufacturing industries of the country is nearly \$15,000,000,000 per annum. Last year the aggregate value of domestic manufactures exported was \$1,854,000,000, an increase of nearly \$136,000,000 over the preceding year. The aggregate value of manufactures exported in the year ended June 30 was \$1,086,000,000, or more than 54 per cent. of the entire exports for that year.

Special significance is attached to the increase of nearly \$20,000,000 in the exports of completed manufactures, in view of the fact that the exports of raw materials declined more than \$21,000,000, this loss being entirely in the cotton trade with China. The popular feeling in that country against the export of raw materials has been a contributory cause for this decline.

The cotton seed product industry now represents an invested capital of \$100,000,000. The exports for the year were upward of \$40,000,000, an increase of \$5,000,000 over the fiscal year 1906.

It is pointed out that one of the obstacles to the enlargement of our export trade is the uncertainty of trade between places of production and the seaboard. Merchants in the Orient especially complain that calculation cannot be made as to when goods ordered in the United States will be delivered, and in consequence orders go to European houses that should come to those of this country. The bureau has been in correspondence with managers of railway and ocean steamship companies to secure more reliable and rapid transit for merchandise destined to foreign countries. What is needed is a system by which carloads of merchandise consigned to foreign countries when started should be kept moving continuously toward destination.

## SPEED IN LIGHT HARNESS

GREAT SEASON FOR EARLY SPEED ON THE TROTTERING CIRCUITS.

Hedgewood Boy and Lady Maud C. Once a Farm Team, the Sensational Pacers—Records by Young Trotters at Lexington—Stakes for Four-Year-Olds.

Light harness horses have done with their racing, except the few to be speeded in sharp shoes on the ice or in Speedway brushes, until the call resounds for the season of 1908. The grand circuit races and the aftermath to close the season at Lexington were remarkable for the number of speedy three and two-year-olds and the accession of so many green ones to the 2:10 list. There were thirty-two trotters and eighty-four pacers added to this list, which is unprecedented for the side-wheelers, while the total of square steppers to pass the division line has only been exceeded in one year. The youngsters have trotted nearly as fast as the older horses, and the breeders have renewed confidence in the hope that early speed may be bred as surely in the light harness horse as in the thoroughbred.

Fantasy's world record for three-year-olds of 2:08½, made in 1893, was cut two seconds by General Watta and equalled by Kentucky Todd. Both are to be in retirement next season, for there are no rich purses for four-year-olds and in the class races they would be up against older horses. As five-year-olds the two will again be in line, but as a climax to the efforts to bring out the speed in two and three-year-olds it seems illogical that stakes are not arranged of such value that it would pay better to race four-year-old colts than to send them to the stud. To send a sound three-year-old champion into retirement would be deemed a crime on the racing front.

At Lexington Trampstap gained the two-year-old race record of 2:12½ and Helen Hale the similar record for fillies of 2:13½. Flyers also in the two-year-old trotters were Dorothy Axworthy, 2:15½; the one to force Trampstap to his world's record; Bivolo, 2:15½; The Leading Lady, 2:16½; Oro Lambert, 2:17½; and Thistle-down. Eleven two-year-olds trotted better than 2:30 at Lexington. The class of the three-year-olds was also shown by Bivolo, who rushed General Watta in his record race and was separately timed in 2:30 and 2:09½; Belle Bird, 2:11½; Miss Denmore, 2:12½; Bonnie Way, that beat 2:12 in her first race, before the mile and a half race in 2:08 before going long; Rhythmic Bel, owned by M. W. Potter of Manhattan, took a mark of 2:13½ in the winning match with The Natchez; and Clay City, a three-year-old, won the mile and a half race in 2:08 before going long; Rhythmic Bel, owned by M. W. Potter of Manhattan, took a mark of 2:13½ in the winning match with The Natchez; and Clay City, a three-year-old, won the mile and a half race in 2:08 before going long.

The American Rhodes scholars at Oxford University have lately distinguished themselves as athletes. At the Oxford University Athletic Club a little more than a week ago D. J. Herring, formerly of Princeton and now of Merton College, won the freeman hammer throwing contest with a throw of 90 feet.

W. Bickmore of Winchester and New College, with a throw of 80 feet 2 inches. At the Braconne College meet, Oxford, L. C. Hull, of Switzerland, won the shot put with a throw of 44 feet 6 inches and the high jump with a jump of 5 feet 3 inches. Hull also got placed in putting the 16 pound shot.

There are now 318 trotters in the 2:10 list, according to the Year Book, but since Jay-See first made the even mark at Providence in 1884 all six have had the aid of the pneumatic sulky, and some wind shields. The United States has gained its record with the high wheel sulky were Jay-See, 2:10; Sunol, 2:08½; and Sunol, 2:08½. Jay-See, 2:10; Sunol, 2:08½; and Sunol, 2:08½.

As the strong representation of newcomers of eighty-four to the 2:10 list reveals, there is greater average speed among the pacers, but no world records were lowered. Angus Porter, 1:58, was the star of the free for all, his best time being 1:58. The time of the racing season was the advent at Columbus of Dick McMahon with a trio only known to fame at the Western half mile track, and some wind shields. The United States has gained its record with the high wheel sulky were Jay-See, 2:10; Sunol, 2:08½; and Sunol, 2:08½.

## STEWART & SONS PIANOS

Stewart and Sons are the only piano manufacturers in the world who make every component part of their pianos, including the castings of all metal parts, within their own factories.

As a result, every Stewart Piano is a perfect, integral whole—not merely an assemblage of parts—presenting a remarkable blending of art and industry.

For proof examine a Stewart Miniature Grand at \$800, or a Vertegrand (an upright) at \$550.

Pianos of all makes taken in exchange. Time payments if desired. Also pianos for rent.

STEWART & SONS, Steinway Hall, 107 and 109 E. 4th St., New York.

Subway Express Station at the Door.

## WASHINGTON, Nov. 24.—Frank P. Sargent, Commissioner-General of Immigration, who has been ill at his home in this city since his return from New York Thursday, was reported to have improved today.

Mr. Sargent is suffering from congestion of the brain, but his friends and physicians say that he has at no time been in a serious condition. Mr. Sargent was born in East Orange, Vt., in 1854. He served in the army during the Civil War, and was a member of the National Civil Federation.

W. H. Skillman's Second Trial Today. SOMERSETT, N. J., Nov. 24.—The second trial of William H. Skillman, who has been prominent in the political and social affairs of Somerset county for fifty years, will begin here to-morrow. He is accused of forging the will of his friend and neighbor, William Lenehan, a retired business man of New York city, who died in March, 1905. A sensation of the first trial was a charge of attempted jury tampering.

Yawl for C. H. Barrett. A shallow draught cruising auxiliary yawl built for G. H. Barrett has been launched at the yard of the Gas Engine and Power Company and Charles L. Seabury & Co., Consolidated, Morris Heights. The principal dimensions are 32 feet long, 10 feet beam, 12 feet water line, 12 feet beam, and 2 feet 6 inches draught. She has the clipper bow, as the owner preferred that type to the modern spoon bow. The deck is flush aft, and is of very light construction.

Rhodes Scholars Win Again. The American Rhodes scholars at Oxford University have lately distinguished themselves as athletes. At the Oxford University Athletic Club a little more than a week ago D. J. Herring, formerly of Princeton and now of Merton College, won the freeman hammer throwing contest with a throw of 90 feet.

Danny Maher Not Coming Home. Word has come from England that Danny Maher, the American jockey, will not come home this winter. In former years he usually came here for a rest until the English racing season opened, but this time he will ride after home until some time in January. Then with J. H. Ruel, Martin, who is an expert tobogganist, he will go to Davos Platz, in Switzerland, and stay there until spring.
